REPORT

Consolidated Website Project Screenshots

This report presents screenshots and brief explanations of three responsive website projects: Foodie, BTechFest 2026, and ShopEase.

Foodie - Online Food Ordering Website

A responsive food ordering interface with a welcoming homepage, food images, prices, menu filters for burgers, pizza, Indian meals and desserts, add-to-cart buttons, and a promotional offer.

Conclusion

These projects demonstrate webpage layout, navigation, responsive image-based cards, categorized content, and user-facing buttons and forms. The screenshots document the visible interfaces; backend transactions and form submissions are not verified by these images.
